

## Philips Airfryer HD928X — User Guide (Text-only)

### 1. Important Safety Information

#### Danger

- Only place food inside the basket. Do not allow food to touch the heating elements.
- Do not cover air inlets/outlets.
- Never fill the pan with oil or liquid.
- Do not immerse the appliance in water.
- Prevent liquids from entering the appliance to avoid electric shock.
- Do not exceed the maximum food level in the basket.
- Do not touch interior surfaces while operating.
- Ensure the heating element is always clean and unobstructed.

#### Warning

- Verify that the voltage matches local mains supply.
- Do not use the appliance or cord if damaged.
- Keep the appliance and cord away from children under 8 years old.
- Only connect to an earthed socket.
- Leave 10 cm free space around the appliance.
- Steam and hot air exit from top/rear openings—keep distance.
- Hot surfaces—handle the pan and basket with care.
- Do not place the appliance near heat sources.
- Do not operate unattended.
- Unplug immediately if dark smoke appears.
- Store potatoes above 6°C to minimize acrylamide.
- Only operate at temperatures between 5°C and 40°C.

#### Caution

- Household use only.
- Allow appliance to cool for 30 minutes before cleaning.
- Ensure food cooks to a golden-yellow color.
- Be cautious with remote cooking or delayed start.
- Fatty foods may cause smoke.

#### Automatic Shut-off

The appliance switches off automatically after 20 minutes of inactivity.
